Medicare.gov

Philip,

We've got good news to share! Thanks to the [prescription drug law](#) that went into effect this year, even more **vaccines are free for people with Medicare Part D** — an average savings of up to \$70 in out-of-pocket costs each year.

This means more people with Medicare being protected against disease and severe illness.

Examples of vaccines now covered under Medicare Part D include:

- Shingles
- Tetanus/diphtheria (Td)
- Tetanus, diphtheria, and pertussis (whooping cough) (Tdap)
- Hepatitis A

- Hepatitis B

Flu shots, COVID-19 vaccines, and pneumococcal shots are still covered by Medicare.

[More Info](#)

Serious diseases can impact our health and quality of life. That's why it's so important to stay up-to-date with vaccines. Talk with your doctor about which vaccines are right for you!

Sincerely,

The Medicare Team
